Programming Assignment #1

Submitted to:

Department of B.Sc. CSIT

Submitted by:

Your Name

TU Exam Roll Number

Date:

Table of Content

Problem 1:

1. Introduction:

Introduce the concepts with sufficient background to the best of your understanding.

2. Implementation:

Explain the implementation approach and necessary algorithms (if any).

3. Conclusion and Discussion:

Summarize the task you have done and support with discussion and interpretation in the context of relevant concepts.

4. References

Include a list of references used during the research and implementation process. Cite any external sources, scholarly articles, books, or relevant documentation that influenced the experiment or the interpretation of the results. Follow the appropriate citation style specified by your academic institution i.e. in IEEE citation style in our context.
